## LETTER OF RECOMMENDATION

### To Whom It May Concern,

I am pleased to recommend **Abdullah Almamun**, who successfully completed the **Cybersecurity Analyst Internship Program** at EncryptEdge Labs. This intensive 8-week program provided hands-on experience in cybersecurity fundamentals, network security, threat detection, and incident response. Intern demonstrated strong analytical skills, technical expertise, and a proactive approach to cybersecurity challenges.

Throughout the internship, Intern gained proficiency in firewall configuration, malware analysis, security automation, and compliance frameworks. They effectively utilized SIEM tools, intrusion detection systems, and forensic analysis techniques to assess and mitigate security threats. Their Capstone Project: Integrated Incident Response and Emerging Threats Defense showcased their ability to analyze, respond to, and document cybersecurity incidents in a structured and professional manner.

Beyond technical capabilities, Intern displayed excellent problem-solving, collaboration, and communication skills. They worked effectively in team environments, adapted to complex scenarios, and articulated security findings clearly. Their professionalism, eagerness to learn, and ability to apply theoretical knowledge to real-world security challenges make them a valuable asset to any cybersecurity team.

I strongly recommend Intern for any cybersecurity-related role or academic opportunity. Their technical acumen, strong work ethic, and commitment to continuous learning position them for success in the field. Please feel free to contact me at [team@encryptedgelabs.com](mailto:team@encryptedgelabs.com) for any further details.

Yours faithfully,

Laraib Arshad  
Chief Executive Officer  
EncryptEdge Labs Limited
